

**PRODUCT****FIBRA POLIPROPILENO**

- For every kind of paving
- Industrial and decorative pavements
- Plasters and façades
- High resistance to the impact
- Easy application

**PRESENTATION /**

Box of 40 bags (0.600 kg/bags)  
Palets 14 boxes (560 bags)

**LENGHT /**

12 mm

**COLORS /**

Natural white

**YIELD /**

1 bag (0.600 kg) m<sup>3</sup> of concrete

**STORAGE /**

Does not expire  
(Keep shelter form weather and moisture)

**DESCRIPTION /**

Cut polypropylene fiber for concrete and mortar reinforcement.

**CHARACTERISTICS /**

- Reduction of the micro-cracks for retraction in the course of setting avoiding the formation of larger cracks
- Decrease permeability
- Increased resistance to impact and abrasion.
- It acts as a reinforcement to the disintegration
- Substitute the wire mesh

**HOW TO USE /**

- Adding the cement mixer directly at the rate of 0.600 kg/m<sup>3</sup> of concrete.
- The bags are of biodegradable and water-soluble paper in consequence it is not needed to open them before putting them into the cement mixer.

**FEATURES /**

- Density: 0.91 g/cm<sup>3</sup>
- Absorption: null
- Chemical resistance: high
- Modulus of elasticity: 8000-10000 Mpa
- Length: 12 mm
- Diameter: 18 Nm
